# PH

The screenshot displays a MySQL database management tool interface. On the left, a tree view shows the database structure, including schemas like 'information\_schema', 'mysql', and 'test'. The 'test' schema is expanded, showing tables like 'sensorox', 'status', and 'statustemp'. The 'status' table is selected, and its structure is visible: it has columns 'ox' and 'readPH'.

The main area shows the query result for the query: `SELECT * FROM `status``. The result is displayed as a table with 27 rows. The first row is highlighted, showing values for 'ox' and 'readPH'.

Query status: ✓ Showing rows 0 - 24 (27 total, Query took 0.0008 seconds.)

Query: `SELECT * FROM `status``
